## Technical Sessions:

### Session 1 – Building Technology into Estimates: The Estimator's Technology Toolkit.

Successful construction companies must bring technology capabilities to the table – for every client project. Today's new tech advancements allow more speed, accuracy, time savings, and ultimately, cost reductions. What can you do to improve your value to clients? How does your company stack up against the competition? Through interesting case studies and demonstrations, this presentation offers solutions for boosting your efficiency and bottom line.

#### Topics Discussed:

- ITB and plan room headaches -- and solutions
- Innovative Google freeware and what it can do for you
- Social networking and how the construction industry can get involved
- Augmented reality and the convergence of technologies

**Speaker** - James Benham -- president of a technology development firm in Bryan, Texas

### Session 2 - Loan monitoring and risk management for construction financing - perspective of cost consultant

Most, if not all construction projects require some type of financing. The private projects require financing. The government projects require PPP type of partnership financing.

This presentation describes role and mandate of cost consultant, including risk mediation, during the planning, tender and construction phase of the project, in the context of the construction financing. The presentation will include the real case studies of the recent projects.

#### Topics discussed

- What is construction financing
- The role and mandate of cost consultant for construction financing
- Stakeholders risks
- Construction risks
- Risk Mediation
- Case studies 1.2.3.

**Speaker** : Monica Bialski- principal of eManagePro, cost consulting and project management firm in Quebec and Ontario.

**DINNER AT JOHNNY FARINA**, Casual Italian Eatery  
216 Elgin Street, Ottawa
